

Application No. 10/809,705  
Reply to Office Action of November 15, 2004

IN THE SPECIFICATION

Please insert the following section heading above the title of the invention on page 1:

**TITLE OF THE INVENTION**

Please insert the following section headings on page 1 above line 1 and below the title:

**BACKGROUND OF THE INVENTION**

**Field of the Invention**

Please insert the following section heading on page 1, below line 6 and above line 7:

**Description of the Related Art**

Please insert the following section heading on page 4, below line 17 and above line 18:

**SUMMARY OF THE INVENTION**

Please insert the following section heading on page 7, below line 1 and above line 2:

**BRIEF DESCRIPTION OF THE DRAWINGS**

Please insert the following section heading on page 7, below line 18 and above line 19:

**DETAILED DESCRIPTION OF THE INVENTION**

Please replace the paragraph beginning at page 10, line 4, with the following rewritten paragraph:

There is no limitation to the structure of the supporting member as long as the supporting member has an effective heat transfer coefficient in such a range. The supporting member is not always a single member. The supporting member may have a layered structure wherein identical kinds of materials, similar kinds of material or different kings kinds of materials are layered. Fig. 2 shows an enlarged fragmentary view of the supporting member 92 and its surroundings in the system. In this figure, reference numeral 92 designates the annular supporting member provided around the outer peripheral side of the annular sealing member 68. Although the sealing member 68 and the supporting member 92 are both annular, each of the sealing member and the supporting member is not always a ring as a single member. Each of the sealing member and the supporting member may be formed by combining divided sections into a ring shape.
